DETAILED ACTION

1. This office action is in reply to an amendment filed on March 03, 2006. Claims 1, 8, 14, 23, 31 and 38 have been amended. Claims 1-40 are pending.

Response to Arguments

2. Applicant's arguments, filed March 03, 2006, with respect to 35 USC 103(a) rejections of claims 1-40 have been fully considered and are persuasive. 35 USC 103(a) rejections of claims 1-40 have been withdrawn.

3. Applicant's arguments, filed March 03, 2006, with respect to 35 USC 101 rejections of claims 8-13, 14-18, 23-30 and 38-40 have been fully considered but they are not persuasive. Applicant argues that the claims recite practical application within the technological arts and properly recite statutorily allowable subject matter. Examiner disagrees.

Examiner would point out that, claims 8-11, 13 and 31-36 are directed to functional descriptive material (i.e., software, see specification page 20, lines 6-9). When claimed invention taken as a whole is directed to a mere program listing, i.e., to only its description or expression, it is descriptive material and hence nonstatutory. See, e.g., Warmerdam, 33 F.3d at 1361, 31 USPQ2d at 1760.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1-40 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

6. Claims 1-40 are directed to a hashing method of generating/comparing plurality of sub-hash keys. The examiner respectfully asserts that the claimed subject matter does not fall within the statutory classes listed in 35 USC 101. The claimed steps do not result in a tangible result. Claims 1-40 are rejected as being directed to an abstract idea (i.e., producing non-tangible result) [tangible requirement does require that the claim must recite more than a 101 judicial exception, in that the process claim must set forth a practical application of that 101 judicial exception to produce a real-world result, Benson, 409 U.S. at 71-72, 175 USPQ at 676-77].

7. Claims 8-11, 13 and 31-36 are directed to a hashing method of generating/comparing plurality of sub-hash keys. The examiner respectfully asserts that the claimed subject matter does not fall within the statutory classes listed in 35 USC 101. Claims 8-11, 13 and 31-36 are directed to functional descriptive material (i.e., software, see specification page 20, lines 6-9). Claims 8-11, 13 and 31-36 are rejected as being directed to functional descriptive material (i.e., computer program).

8. Claims 1-7, 18-22, 30 and 40 are directed to a hashing method of generating/comparing plurality of sub-hash keys. The examiner respectfully asserts that the claimed subject matter does not fall within the statutory classes listed in 35 USC 101. Claims 1-7, 18-22, 30 and 40 are directed to a computer readable media that includes data signals (see specification page 19). A signal does not fall within one of the four statutory classes of 101. Claims 1-7, 18-22, 30 and 40 are rejected as being directed to data signal.
